

CHECKLIGHT

Constant Security - Continuous Peace of Mind.

WHAT'S THE DANGER?

- 92% of IT professionals say cybercrime is increasing
- Ransomware attacks are expected to claim a new business victim every 11 seconds by 2021
- 43% of breach victims are small businesses
- The current average cost of a ransomware attack is approx. \$180,000

THE CHECKLIGHT SOLUTION

CHECKLIGHT is a powerful and proactive security monitoring software that detects potential threats to your network and alerts you early so attacks can't take hold, reducing the impact in the event of a breach

Relying on the same cybersecurity software engine used by several federal agencies, it identifies unauthorized processes associated with fraudulent phishing attacks, hacking, imposter scams, malware, ransomware and viruses

WHAT MAKES CHECKLIGHT SO POWERFUL?

- It constantly scans your network, identifying and then quarantining viruses as they appear
- It actively learns your system, studies the new viruses it encounters, and develops unique defenses to protect you
- The intuitive platform can be installed and be up and running on your network in 10 minutes
- Since its creation, it has never allowed a breach to go undetected
- Access to real-time support to help solve any identified cybersecurity issue

The only product in the market confident enough to be backed by a \$250,000 warranty.
